1 Using peer review as a vehicle for communication skill development and active learning   ■
Karen Anewalt
December 2005 **Journal of Computing Sciences in Colleges**, Volume 21 Issue 2
Publisher: Consortium for Computing Sciences in Colleges
Full text available: 📄 pdf(187.85 KB)   Additional Information: full citation, abstract, references

> There is a renewed interest in incorporating peer review activities into computer science courses in response to current interest in active learning and group projects. The peer review process models real world professional activities, provides students with the opportunity to learn how to deal with criticism and how to provide constructive criticism to others, and can develop team skills. Without peer review or similar activities, students will receive little practical experience in building th ...

2 Technology to enable learning I: Online student peer reviews   ■
William J. Wolfe
October 2004 **Proceedings of the 5th conference on Information technology education**
Publisher: ACM Press
Full text available: 📄 pdf(177.65 KB)   Additional Information: full citation, abstract, references, index terms

> This paper describes an online method of implementing student peer reviews. The results of applying the method to several courses is also discussed. Each week students accessed each others' assignments, as posted on individual web pages, and submitted scores and comments on the course web site. The course web site did all the bookkeeping, giving students instant access to the reviews they received. Statistics for a particular software engineering class of 34 students are presented.

Keywords: computer based instruction, online, peer review, web

3 Using peer review in teaching computing   ■
Edward F. Gehringer, Donald D. Chinn, Manuel A. Pérez-Quiñones, Mark A. Ardis
February 2005 **ACM SIGCSE Bulletin , Proceedings of the 36th SIGCSE technical symposium on Computer science education SIGCSE '05**, Volume 37 Issue 1
Publisher: ACM Press

Full text available: 📄 pdf(158.65 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

> For generations, the academic community has relied on peer review as a way of encouraging scholarship and enhancing the knowledge base. Peer review has been widely used in the classroom since at least the 1970s, with hundreds of papers on its use in diverse academic fields appearing in the literature (for a comprehensive survey, see [1]). Its use appears to be on the upswing, given the current interest in active learning and teamwork. In computer science, peer review seems to have very broad app ...

4 A design for team peer code review

Deborah A. Trytten

February 2005 **ACM SIGCSE Bulletin , Proceedings of the 36th SIGCSE technical symposium on Computer science education SIGCSE '05**, Volume 37 Issue 1

Publisher: ACM Press

Full text available: 📄 pdf(183.26 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>index terms</u>

> The software industry needs our graduates to have significant and meaningful experiences with teamwork. A new design has been developed for a teamwork exercise based on peer code review. This design uses the three Ss of building assignments for cooperative learning: Same problem, Specific choices, and Simultaneous report. Students perform peer code review individually, and within and between stable small groups. The code can be sanitized student work or may be altered by the instructor to meet s ...

5 Community design of DLESE's collections review policy: a technological frames analysis

Michael Khoo

January 2001 **Proceedings of the 1st ACM/IEEE-CS joint conference on Digital libraries**

Publisher: ACM Press

Full text available: 📄 pdf(194.46 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

> In this paper, I describe the design of a collection review policy for the Digital Library for Earth System Education (DLESE). A distinctive feature of DLESE as a digital library is the &lquo;DLESE community&rquo;, composed of voluntary members who contribute metadata and resource reviews to DLESE. As the DLESE community is open, the question of how to evaluate community contributions is a crucial part of the review policy design process. In this paper, technological frames theory is used ...

> The following statements are taken from a brochure prepared by the ACM SIGUCC Peer

Review Committee to acquaint University Computer Centers with Peer Review. Peer Review is a review of policies, procedures, and services provided in a specific college or university computing center. The goal of a Peer Review is to determine the strengths and weaknesses of an installation. The SIGUCC Peer Review Committee maintains a list of valid peer reviewers, people actively involved in the del ...

7 A digital libraries for education: Partnership reviewing: a cooperative approach for peer review of complex educational resources
John Weatherley, Tamara Sumner, Michael Khoo, Michael Wright, Marcel Hoffmann
July 2002 **Proceedings of the 2nd ACM/IEEE-CS joint conference on Digital libraries**
Publisher: ACM Press

Full text available: pdf(672.00 KB)   Additional Information: full citation, abstract, references, citings, index terms

Review of digital educational resources, such as course modules, simulations, and data analysis tools, can differ from review of scholarly articles, in the heterogeneity and complexity of the resources themselves. The Partnership Review Model, as demonstrated in two cases, appears to promote cooperative interactions between distributed resource reviewers, enabling reviewers to effectively divide up the task of reviewing complex resources with little explicit coordination. The shared structural o ...

Reciprocal peer reviews empower students to master computer science concepts. This industry practice employs peer-to-peer communication within an egoless team structure. As pedagogy, reviews provide a human-interaction laboratory setting where students: hone teamwork and communication skills, master the peer review process, and learn to learn from each other.

9 The evolution of an information development process
Glenn M. D'Amore
October 1999 **Proceedings of the 17th annual international conference on Computer documentation**
Publisher: ACM Press
Full text available: pdf(865.49 KB)   Additional Information: full citation, abstract, references, index terms

In today's business climate of thin profit margins and lean staff, a Documentation manager faces the continual challenge of proving that writers are efficient and productive. One way to do this is to follow an effective information development process with every project. As a manager, a documented process helps you:Repeat successful project activitiesCreate realistic schedulesTrain new staff quicklyMove ...

10 Education & training track: Using peer reviews in teaching framework development
Amir Zeid, Moemen Elswidi

May 2005 Proceedings of the 27th international conference on Software engineering
Publisher: ACM Press
Full text available: pdf(150.67 KB) Additional Information: full citation, abstract, index terms

Framework development is one of the most challenging software development tasks. Teaching framework development is even more challenging. In this paper, we propose a creative process to teach framework development. We propose using peer review in the process. We present the process and some examples and findings out of our experience.

Keywords: framework development, object-oriented software engineering

11 A process-oriented methodology for assessing and improving software trustworthiness
Edward Amoroso, Carol Taylor, John Watson, Jonathan Weiss
November 1994 **Proceedings of the 2nd ACM Conference on Computer and communications security**
Publisher: ACM Press
Full text available: pdf(1.18 MB) · Additional Information: full citation, abstract, references, index terms

A high-level, technical summary of the Trusted Software Methodology (TSM) is provided in this paper. The trust principles and trust classes that comprise the TSM are presented and several engineering investigations and case studies surrounding the TSM are outlined. Appendices are included that highlight important areas of the TSM.

12 Software documentation and readability: a proposed process improvement
Nuzhat J. Haneef
May 1998 **ACM SIGSOFT Software Engineering Notes**, Volume 23 Issue 3
Publisher: ACM Press
Full text available: pdf(341.05 KB) Additional Information: full citation, abstract, index terms

The paper is based on the premise that the productivity and quality of software development and maintenance, particularly in large and long term projects, is related to software readability. Software readability depends on such things as coding conventions and system overview documentation. Existing mechanisms to ensure readability --- for example, peer reviews --- are not sufficient. The paper proposes that software organizations or projects institute a readability/documentation group, similar ...

13 MIT model analysis program: what we have learned about policy model review

14 Information sharing and access: The multiple views of inter-organizational authoring
David W. McDonald, Chunhua Weng, John H. Gennari
November 2004 **Proceedings of the 2004 ACM conference on Computer supported cooperative work**
Publisher: ACM Press
Full text available: pdf(935.59 KB) Additional Information: full citation, abstract, references, index terms

Collaborative authoring is a common workplace task. Yet, despite improvements in word processors, communication software, and file sharing, many problems continue to plague co-authors. We conducted a qualitative study in a setting where participants are loosely connected, physically separated, and work together over a period of 4-9 months to author

a complex technical document-a clinical trial protocol. Our study differs from most prior work in that the collaboration is longer-lived, and that ...

The review process for a technical document is a harrowing experience for all involved. Some techniques do exist however, that can ease the pains and smooth the path to a well-done and accurate final product. The responsibility for using these techniques rests with many people: the editor who solicits review comments, the technical expert who must correct inaccuracies, the interested party who has another perspective on the subject, the manager who must approve the piece. Each of these peop ...

Most computing programs now have some form of integrative or capstone course in which students undertake a significant project under supervision. There are many different models for such courses and conducting these courses is a complex task. This report is intended to assist instructors of capstone courses, particularly those new to the model of teaching and learning inherent in the capstone course.This paper discusses important issues that must be addressed when conducting capstone courses. Th ...

Full text available: pdf(418.67 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>

Both government and industry are involved in the acquisition and development of modeling and simulation (M&S) products. The effectiveness and maturity of an organization's acquisition process directly affect the cost, schedule, and quality of the M&S products that are delivered to the user. When M&S program sponsors implement best practices throughout acquisition, critical verification, and validation (V&V) tasks can be conducted without inordinate cost. Department of Defense (DoD) Instruction 5 ...

Full text available: pdf(43.80 KB)   Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index terms</u>

Students in programming courses can learn from peer evaluation of their work. Also a student can learn by evaluating other students' works and can find many useful techniques in them to improve his/her programming skill. There are many tools available for online course management. However, none of them fully supports anonymous peer evaluation of assignments. In this work, we present a Web-based system that can be used to manage peer evaluation of assignments electronically and anonymously. The p ...
